Subject: OHRP Complaint #00702400 No Action

Thank you for contacting the Office for Human Research Protections (OHRP). Based on the information you provided, your complaint does not fall under OHRP's authority. Our office is responsible for the U.S. Department of Health and Human Services (HHS) regulations that protect people in research. Our regulations only apply to research with living individuals, if the research is funded or conducted by HHS. Note that some research may be exempt from the regulations.

OHRP does not have authority over this matter and will not be able to pursue the matter on your behalf. No additional action will be taken.

For more information about OHRP's authority and other organizations that might be helpful, please see our website: <https://www.hhs.gov/ohrp/compliance-and-reporting/submitting-a-complaint/index.html>.

The description you provided of the complaint has been included below:

- I have insider whistleblower knowledge of all the details of a CIA sponsored 24/7 torture PSYOP targeting conspiracy that's been running against me for 2 years.

Turns out I was never an intended target for being thrown into this program with standard targets being mentally ill for the reason that their preexisting mental health diagnoses immediately render any claims of outside abuse as delusional. There are so many of these victims that they have formed an online community and call themselves targeted individuals and sadly the CIA is in full control of their narrative keeping actual victims from ever being recognized within a sea of other mentally ill people who've all been encouraged to blame the same source for their psychoses. This is an open secret within the intelligence and law enforcement communities with all local, state, and federal authorities being directly involved or complicit.

The technology being used to run these 24/7 PSYOPs is a extra dimensional BCI RNM NHI psychotronic surveillance technology that they are using nationwide in joint investigation's surveillance operations. It's been 6 months of me trying to avoid full exposure and disclosure and exposure is part of their agenda. This program is a drug free continuation of MKULTRA and needs to be stopped with no authority willing to go against the CIA.

Sincerely,
Division of Compliance Oversight
Office for Human Research Protections (OHRP)
